

Technology is transforming our life in many areas – also in the working world. People-Analytix identifies skills within large organizations, creates an inventory and offers a great range of features to individual employees as well as to the management. While job titles are becoming less meaningful the skills needed to do a job are getting more and more important. Do you have the right skill profile to become our next:

JUNIOR SOFTWARE DEVELOPER

Are you interested in solving one of the most pressing issues of our society? Are you eager to work in close cooperation with our data scientists on cutting edge technology? Do you have the proactive mindset to drive our lead projects? We are looking for the following profile:

Your background:

- 1-2 years of work experience in a similar role
- Capable to combine existing technologies
- Eager to analyze produced results
- Familiar in coding basic GUI functionality
- Likes to work on back-end as well as on front-end tasks

You are familiar with:

- Python, Java, C++
- SQL (PostgreSQL, MySQL)
- NoSQL (Cassandra, Mongo)
- Web API
- UNIX, Linux, Windows,
- Hadoop (MapReduce, Hive, Pig, Kafka, Spark)
- Meteor, Perl, R

We are a young, dynamic startup @ Technopark in Zurich and offer an experienced and energetic team. We know how to have fun in and off projects and we are looking for new colleagues with a professional mindset and willingness to take ownership.

As an early team member, you will have the benefit of growing alongside our team, our product and our clients while enjoying the comfort of a strong head-start. We are financed and ready to scale our product.
